

## Two color systems that collide

Same color, different meaning. Always ask: am I reading the cable jacket, or the connector body?

### SYSTEM A · CABLE JACKET

TIA-598-D · what the fiber IS

Orange

OM1 / OM2 multimode

Aqua

OM3 / OM4 multimode

Lime green

OM5 multimode (wideband)

Yellow

OS1 / OS2 single-mode

### SYSTEM B · CONNECTOR BODY

TIA-568/598 · how it's POLISHED / sized

Beige

Multimode 62.5/125 (OM1)

Aqua

Multimode OM3 / OM4

Blue

Single-mode UPC (flat)

Green

Single-mode APC (8° angled)

### THE COLLISION

Green: lime JACKET = OM5  
vs green BODY = APC single-mode

Label which system a swatch belongs to. The color alone never tells you.

Aqua appears in BOTH:  
OM3/OM4 jacket AND OM3/OM4 body

Jacket ≠ body.

OM1 nuance: jacket is orange, but the connector-BODY convention for 62.5/125 is beige. The cable is not beige.
